

the art of development

the art of reliability

the art of service

developing state of the art soft- and hardware in the mushroom industry

The cultivation of good, high-quality mushrooms is a specialized process. In addition to making excellent-quality compost and creating the proper climate, it is important to use the right tools. At Dalsem Mushroom Projects you are assured of sound knowledge and skills when it comes to selecting and manufacturing these tools.

We develop, build and supply high-quality equipment and innovative software systems for compost yards and mushroom farms over the entire world, whether you are looking for technologies to construct phase I bunkers, phase II/III compost tunnels or mushroom growing rooms. Not only can you construct turn-key, Dalsem Mushroom Projects can also supply you with individual climate systems and specialized compost and growing machines. You are not only sure of high quality, a detailed custom design and excellent service, Dalsem Mushroom Projects is always trying to improve its technology. So its no surprise that we talk about 'the art of development'.

controlling the chain of engineering construction transport and assembly

Opting for Dalsem Mushroom Projects means opting for reliability. We handle the entire process of designing, manufacturing, transporting and constructing. Our expert draughtsmen ensure a complete detailed design, fully in line with your wishes, requirements and possibilities.

Following your approval, the designs are converted into high-quality products. We are involved in the smallest details of progress from design to manufacture. Together, we ensure that all materials have been acquired on time for the further assembly and transport to your location. In close cooperation with local supervisors, your project is subsequently carried out in accordance with the design. You can therefore prepare for a promising start or extension of your compost yard or mushroom farm with an easy mind. At Dalsem Mushroom Projects, we are not so much interested in standard designs but in an appropriate solution, with a focus on reliability. We just simply call it 'the art of reliability'.

creating value working with international contacts in business and cooperation

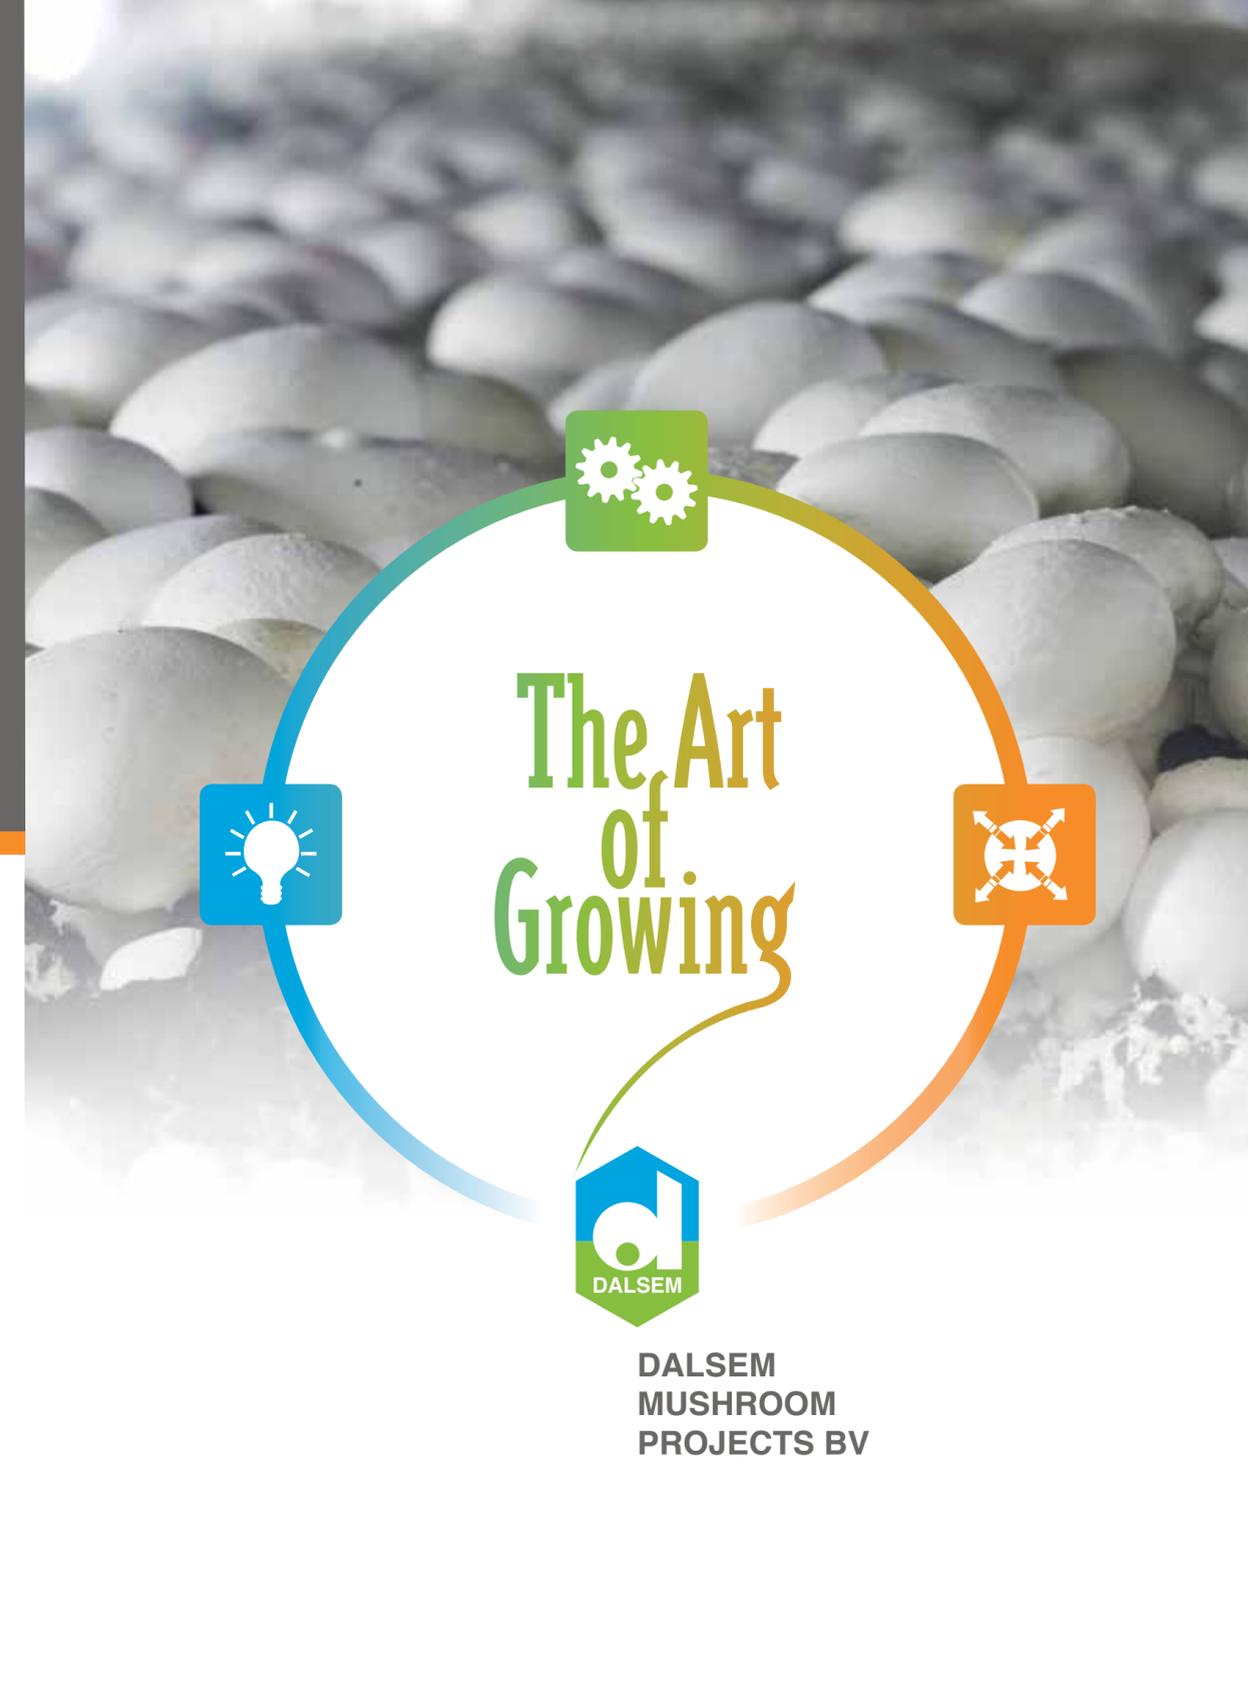

At Dalsem Mushroom Projects, quality and service go hand in hand. Our project team has all the knowledge and experience required to complete your project from A to Z. As every compost yard and/or mushroom farm is unique, we supply only customised solutions. To guarantee a good price/quality ratio, we have a large network of suppliers. All our suppliers manufacture exclusively in accordance with our design, so that you can be sure of a customised high-quality solution for a favourable price.

Moreover, we have close contacts with reliable contractors and project managers all over the world. This means we can deploy the right people at every location to complete your project quickly and efficiently. Upon completion of your project, you can rely on us for proper training, good advice and subsequent delivery of components. Thanks to our flexible way of working, you can always be sure of excellent service at Dalsem Mushroom Projects for the best price/quality ratio. That's what we call 'the art of service'.

DALSEM MUSHROOM PROJECT LOCATIONS

the drive of the Dalsem Mushroom Projects team

You need to think carefully before setting up or expanding your mushroom farm. We understand this at Dalsem Mushroom Projects.

The multilingual experts in our project team will be pleased to help you make the right choices and we always go the extra mile. We not only meet your wishes and demands, we also advise you on how things can be improved. It is a challenge for us to find an appropriate and innovative solution to every question. That means thinking constructively and anticipating, so that your compost yard and/or mushroom farm already meets your wishes for the future. So opting for Dalsem Mushroom Projects is also opting for sustainability!

The art of growing. That's what it's all about in the mushroom industry. Dalsem Mushroom Projects BV designs, builds and supplies all equipment and systems you require to set up this specialized growing process. For this purpose, we use innovative technologies and high-quality materials, customised down to the smallest detail to suit your wishes and local climate situation. It's therefore no surprise that compost yards and/or mushroom farms all over the world have been gratefully using our products and services for many years.

Dalsem Mushroom Projects BV is part of the Dalsem group, an organisation which is worldwide one of the leaders in the realisation of horticultural and mushroom projects. A family-based company, established in 1932 with it's head office located in Den Hoorn, in the famous agricultural region of 'Westland' near Rotterdam.
