DALSEM MUSHROOM PROJECT LOCATIONS

dalsem growing racks and picking platforms

The art of growing. That's what it's all about in the mushroom industry. Dalsem Mushroom Projects BV designs, builds and supplies all equipment and systems you require to set up this specialized growing process. For this purpose, we use innovative technologies and high-quality materials, customised down to the smallest detail to suit your wishes and local climate situation. It's therefore no surprise that compost yards and/or mushroom farms all over the world have been gratefully using our products and services for many years.

Dalsem Mushroom Projects BV is part of the Dalsem group, an organisation which is worldwide one of the leaders in the realisation of horticultural and mushroom projects. A family-based company, established in 1932 with it's head office located in Den Hoorn, in the famous agricultural region of 'Westland' near Rotterdam.
